

PLC/HMI Starter Kit (FPX)

A complete package for a special, one-time price! The Starter Kit contains a compact and powerful PLC with 14 or 30 inputs/outputs, including programming software, all necessary cables and a touch panel.

Contents:

- ▶ PLC FPXC14R and the programming software FPCWIN Pro
- ▶ 3,8" touch panel GT02 and the programming software GTWIN
- ▶ RS232C programming cable for PLC and HMI, cable to connect the FP-X and GT02, power supply cable

Contents:

- ▶ PLC FPXC30R and programming software FPCWIN Pro
- ▶ 3.5" touch panel GT03-E and the programming software GTWIN
- ▶ USB programming cable for PLC and HMI, cable to connect the FP-X and GT03-E

The bright touch panel of the GT02 (240x96 pixels, STN monochrome, IP67) and GT03-E (320x240 pixels, TFT monochrome, IP67) display messages and machine data in high contrast, making them easy to read. With a depth of just 28mm/28.4mm, the GT02/GT03-E requires little mounting space. When using the GT02, the 5VDC power supply is provided via the PLC's TOOL port.

The FP-X PLC is perfectly suited to control machines and equipment. Due to its expanded memory, ability to process commands more quickly than previous compact controllers, and integrated positioning functionality for up to four axes (i.e. no extra positioning unit required), the FP-X is equipped to handle a great many applications.
